

### **Electronic Smoking Devices:** Policy Recommendations and Pitfalls

E. Ulysses Dorotheo, MD, FPAO Executive Director, SEATCA

19 May 2021

International Society of Substance Use Professional (ISSUP) webinar series *New electronic smoking devices – what's the difference?* 

## Disclosures

- Executive Director, Southeast Asia Tobacco Control Alliance (SEATCA)
- Member, Tobacco Experts Group, World Heart Federation
- Member, International Advisory Board, World Conference on Tobacco or Health
- No conflict of interest to disclose

# Nicotine without smoke

"People smoke for the nicotine but die from the tar." (Michael Russell, BMJ, 1976)

Who is Michael Russell?

- British psychiatrist
- proponent of *theoretical* low-tar, high nicotine cigarette
- collaborated with BAT on two 'safer' cigarette studies
- engaged RJR on a study of its HTP, Premier
- espoused cigarette filters as helping reduce smoking risk [now proven false]

Russell, MAH. (1976). Low-tar medium-nicotine cigarettes: a new approach to safer smoking. BMJ, 1:1430-1433

Elias J, Ling PM. Invisible smoke: third-party endorsement and the resurrection of heat-not-burn tobacco products. *Tobacco Control* 2018;27:s96-s101. https://tobaccocontrol.bmj.com/content/27/Suppl\_1/s96.long

# Industry "transformation"

- Claim: "no combustion = no tar, no ash, no smoke = 90-95% less harmful"
- "smoke-free" but not tobacco-free

### **Smoke? Vapor? Aerosol?**

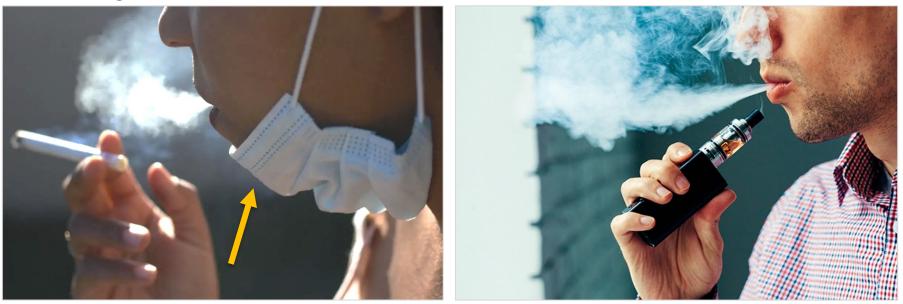

#### **Aerosol** = aero-solution

suspension of fine solid particles and/or liquid droplets in air

Cigarette smoke/aerosol

ESD aerosol

Credit: Courtney Africa/RealTime Images/ABACA/PA Images

Credit: fotofabrika - stock.adobe.com

COVID-19 risks

- Aerosol + mask removal
- Hand to mouth movement
- Shared products/devices

# Toxicity / health harms ....reduced?

"I'll bet that the first company to produce a cigarette claiming a **substantial reduction in tars and nicotine** ... will take the market."

-1958, Philip Morris scientist

PJ Hilts. (1996). Smokescreen - The Truth Behind the Tobacco Industry Cover-Up, Addison Wesley, p26, quoting CV Mace, Memo to R N DuPuis, Untitled, 1958, 24 July.

## No combustion?

#### black, sticky, tar-like substance

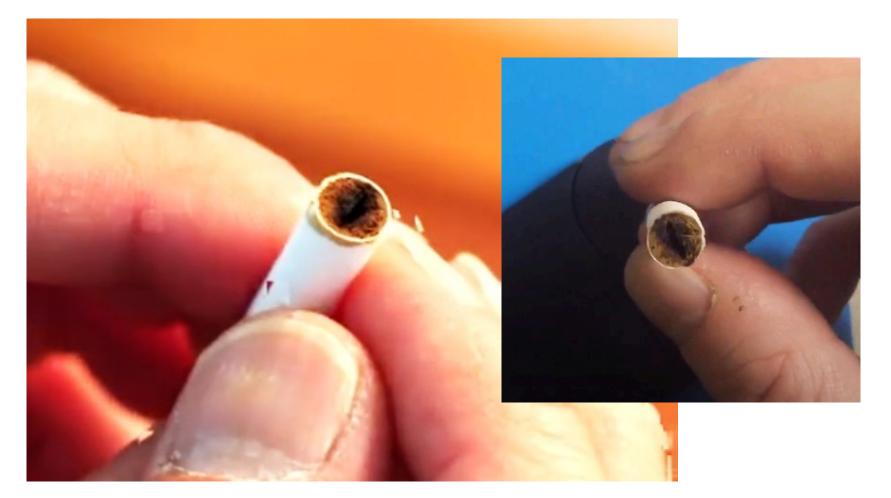

Caused by

- sweet flavors
- veg glycerin
- high wattage
- intense vaping

### charred IQOS Heet stick

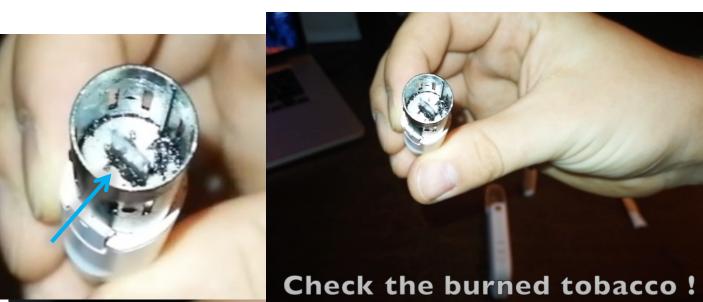

Screen captures from different video reviews of IQOS

### **IQOS: debris from burned heat stick**

Before cleaning

\*Instructional video on cleaning iQOS

#### ENDS: toxic chemical aerosol (not vapor) (chemical reactions from <u>mixing</u> and <u>heating</u>)

Propylene glycol + vegetable glycerin + flavors + nicotine (mixing without heating)

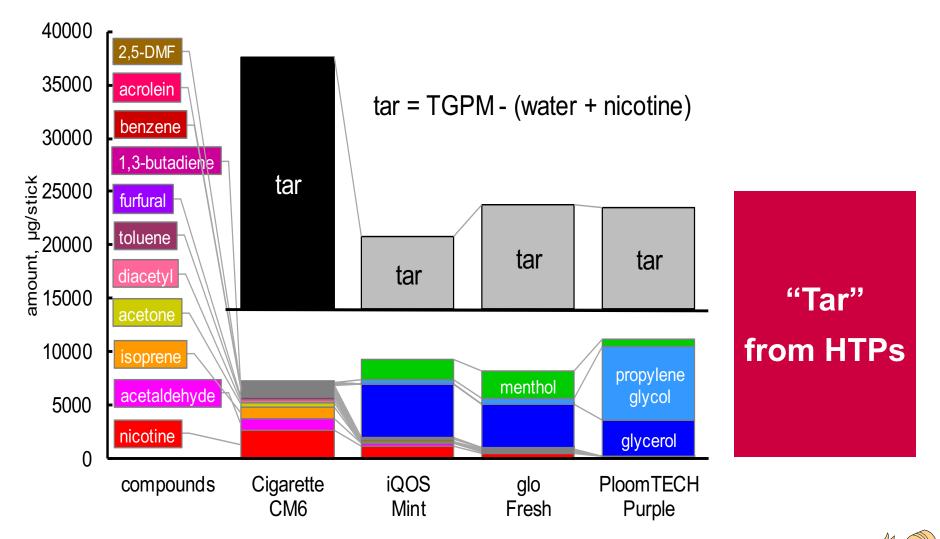

= ingredients + chemical byproducts

fine particulate matter (PM 2.5), glycols, aldehydes (e.g. formaldehyde), volatile organic compounds (VOCs), polycyclic aromatic hydrocarbon (PAHs), tobacco-specific nitrosamines (TSNAs), toxic metals (lead, nickel, and chromium), silicate particles and others

### HTP: Less tar, not "no tar"

Uchiyama S, Kunugita, et al. (2018). Simple determination of gaseous and particulate compounds generated from heated tobacco products. *Chemical Research in Toxicology 31*, 585–593. http://pubs.acs.org/action/showCitFormats?doi=10.1021/acs.chemrestox.8b00024

SEATCA

# Reduced dose = reduced harm?

Q: ... safer than regular smoking?

- smoking intermittently or socially

- smoking just one cigarette a day

A: No.

100% poison vs 5% poison

Bjartveit, K., & Tverdal, A. (2005). Health consequences of smoking 1-4 cigarettes per day. *Tob Control*, *14*(5), 315–320. doi:10.1136/tc.2005.011932

Schane, R. E., Ling, P. M., & Glantz, S. A. (2010). Health effects of light and intermittent smoking: a review. *Circulation*, *121*(13), 1518–1522. doi:10.1161/CIRCULATIONAHA.109.904235

### PMI warning to US FDA re iQOS

Extract from Philip Morris International's Modified Risk Tobacco Product Application to the US Food and Drug Administration [15, p18].

#### PMI IMPORTANT WARNING:

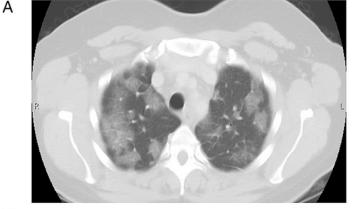

- It has not been demonstrated that switching to the *iQOS* system reduces the risk of developing tobacco-related diseases compared to smoking cigarettes.
- HeatSticks contain nicotine, which is addictive.
- Using the *iQOS* system can harm your health.

CHEST 2012; 141(4):1110–1113

# An Unexpected Consequence of Electronic Cigarette Use

Lindsay McCauley, DO; Catherine Markin, MD, FCCP; and Danielle Hosmer, MD

В

FIGURE 1. Representative CT images show the "crazy paving" pattern of patchy ground glass superimposed on interlobular septal thickening. A, Bilateral upper lobes. B, Bilateral lower lobes.

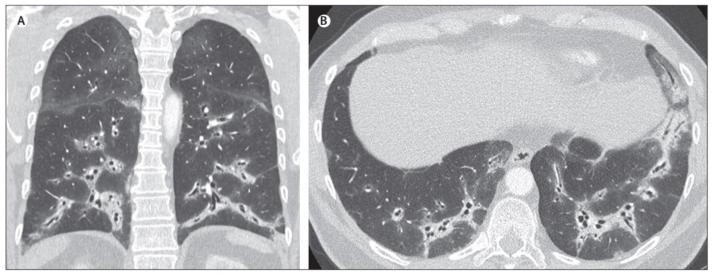

- First published report of lipoid pneumonia linked to e-cigarettes
- 42 y.o. female
- Non-smoker
- 7-month use of e-cigarettes

#### Lancet 2020; 396: 564

#### E-cigarette-induced lung disease: from acute to chronic

Florian Poschenrieder, Michael Rotter, Andreas Gschwendtner, Okka W Hamer

#### Figure: E-cigarette-induced fibrosing interstitial lung disease

A high-resolution chest CT scan shows lower lobe predominant, bilateral consolidations in a peribronchovascular distribution—the pattern of an organising pneumonia—in both coronal (A) and transverse (B) sections.

- 52 y.o. male, smoker for 40 years
- "Quit" smoking and started non-THC vaping for past 4 months
- Dx: organizing pneumonia indicating foreign body inhalation
- Stopped vaping; started steroid tx, but no improvement after 4 months
- Repeat bronchoscopy: non-specific interstitial pneumonia, indicating chronic inflammation

#### 2016 (Japan)

# Acute eosinophilic pneumonia following heat-not-burn cigarette smoking

20 y.o. male, started smoking 20 cigarettes of HC per day 6 months previously and then purchased a second device for smoking HC to increase smoking HC to 40 cigarettes a day 2 weeks before hospitalization.

Kamada T, Yamashita Y, Tomioka H. (2016). Acute eosinophilic pneumonia following heat-not-burn cigarette smoking. *Respirol Case Rep* 4(6):e00190. doi:10.1002/rcr2.190

#### **IQOS** social media campaign

### Similarities in marketing tactics

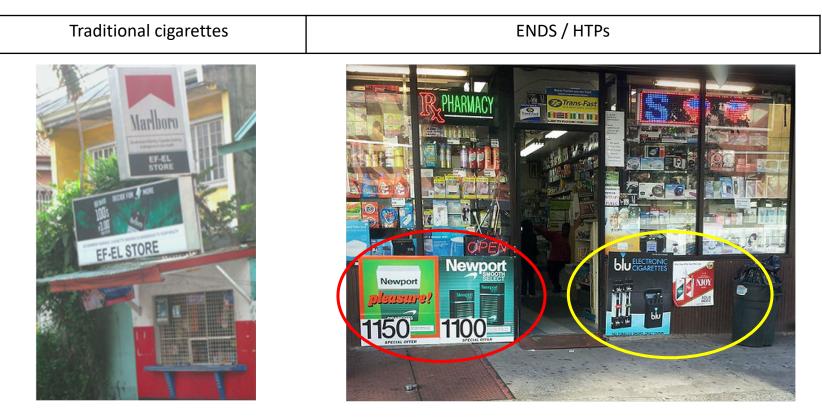

Source: https://bit.ly/2B1wuWM and https://stanford.io/2X4eovY

## Similarities in marketing tactics

Source: https://bit.ly/2XEh5TU and https://bit.ly/3d8QftO

# Industry: "switching products", not cessation products

(but marketed as "quitting" smoking)

## Dual use is common

#### Hon Lik invented the e-cigarette to quit smoking - but now he's a dual user

Chinese pharmacist says he only smokes cigarettes now to check flavours, and he sees no conflict with company he works for being owned by Imperial Tobacco

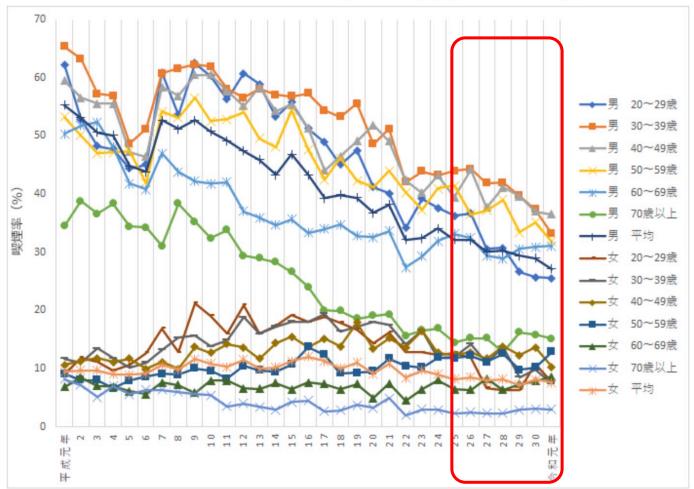

▲ Hon Lik, inventor of the e-cigarette, uses one of the devices in London on Tuesday. Photograph: Stefan Wermuth/Reuters

#### Since 1980s, gradual decline in smoking rates Since 2014 intro of HTPs, no major decline in smoking rates

Japan 1989-2020

Annual transition of smoking habits (by gender and age)

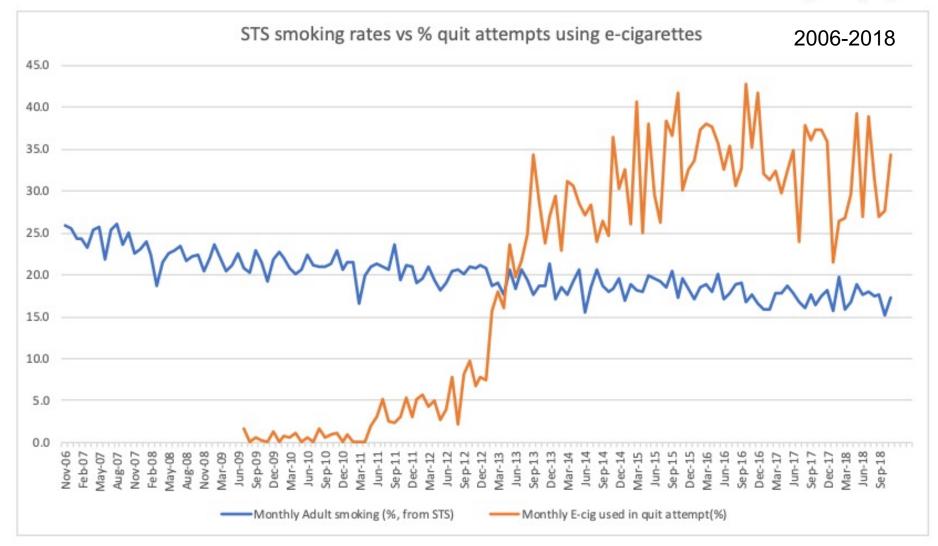

#### •Adult smoking rate (Ministry of Health, Labor and Welfare National Health and Nutrition Survey)

Currently, the percentage of people who smoke habitually is 16.7%, and by gender, 27.1% are men and 7.6% are women. Over the last 10 years, both have decreased significantly. By age group, the percentage is high among men in their 30s and 60s, and about 30% habitually smoke.

http://www.health-net.or.jp/tobacco/product/pd100000.html

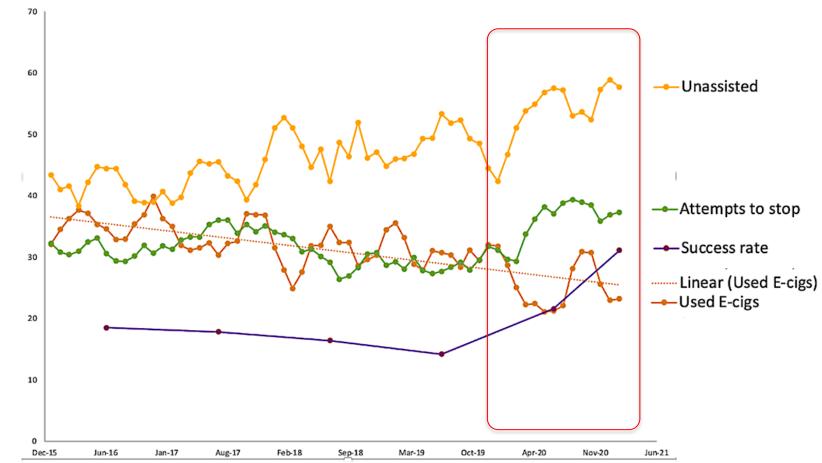

#### **UK: no impact on smoking rates**

SMOKING

TOOLKIT STUD

#### Quit attempts and success vs cessation strategy, England 2016-21

**Prof. Simon Chapman**: In the midst of a pandemic, English smokers are quitting in droves. So how are they doing it? 15 April 2021 Ref: <u>https://simonchapman6.com/2021/04/15/n-the-midst-of-a-pandemic-english-smokers-are-quitting-in-droves-so-how-are-they-doing-it/</u>

### **Basis for regulation**

### ESDs are harmful to health

- Toxic chemical aerosol
- Known health harms
- Sustained addiction
- Hindrance to cessation; switching isn't quitting
- Youth uptake
- Distraction/threat to tobacco control

# Regulatory policy experience in the

### Taxation

- Reduce affordability to discourage use
- Raise government revenues, ideally allocated for tobacco control and health promotion

### Taxation

Industry lobbies for low tax rates

Specific tax rates effective 1 Jan 2020, in PHP

	cigarettes	ENDS	HTP
RA 11346	45 /pack + 5/yr	1.00 / ml + 5%/yr	10 /pack + 5%/yr
RA 11467	maintain	4.50 / ml (freebase) + 0.50/yr	25 /pack + 2.50/yr
		37/ml (salt) + 5/yr	

### **Smoke-free** environments

- Protect from exposure to toxins in air
- Encourage cessation
- Denormalize tobacco use

### **Smoke-free Policy**

 Industry lobby for indoor use of both conventional and new products

# Large pictorial health warnings and Standardized packaging

- Reduce attractiveness of tobacco products
- Raise awareness of health harms
- Encourage cessation and prevent youth uptake

SEATCA

### Ang paninigarilyo ay sanhi ng STROKE

### Ang paninigarilyo ay sanhi ng **KANSER SA LEEG**

### TRUTH GRAPHIC HEALTH WARNINGS (RA 10643), 2014

#### PANINIGARILYO + MAGULANG = PREMATURE BIRTH

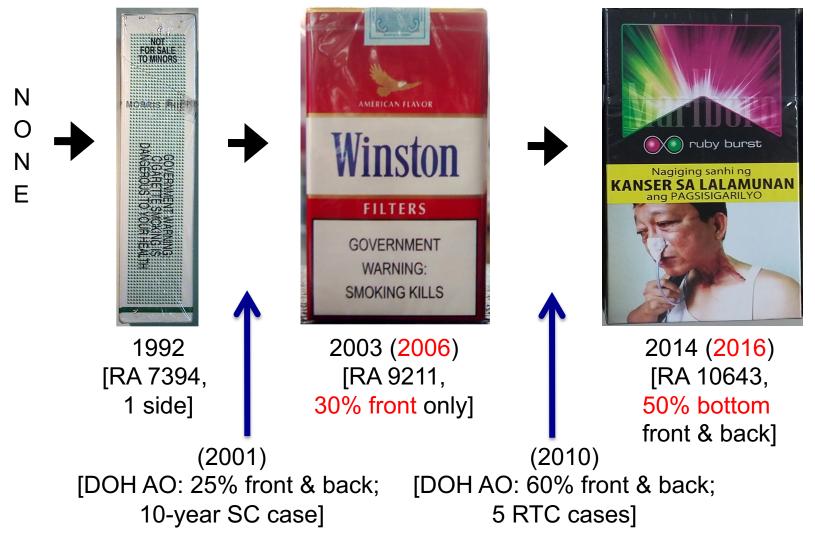

Nagiging sanhi ng KANSER SA BIBIG ang PAGSISIGARILYO

## Smoking causes

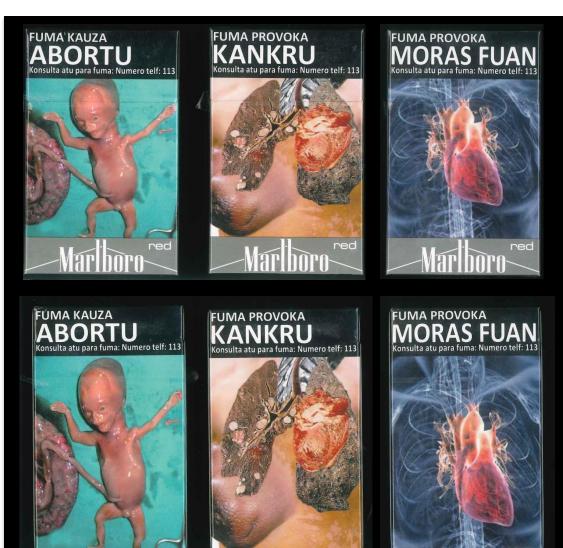

## 24 years to GHWs because of industry interference

### World's largest PHW: Timor Leste

(85% front, 100% back)

Philippines

### Standardized tobacco packaging in Asia

Thailand 85% PHW

Singapore 75% PHW

## **Packaging/Health Warnings**

- RA 11346 requires PHWs for ENDS/HTP
- Industry lobbying to remove PHWs and have text-only warning
- Industry against standardized packaging

JUUL in Israel before and after standardised packaging

### OUT OF SIGHT, OUT OF MIND

### Ban on tobacco advertising, promotion, and sponsorship (TAPS)

- Reduce attractiveness of tobacco products
- Denormalize tobacco products / industry
- Support cessation and prevent youth uptake

## **Advertising and Promotion**

- RA 9211 imposes only partial marketing restrictions for tobacco products
- Industry lobby for similar partial restrictions for ENDS and HTP plus allow online marketing, despite claim that products are "not intended for non-smokers or minors"

### Ban on sales to youths

- Reduce youth access to tobacco products
- Prevent youth addiction
- Denormalize tobacco products / industry

- RA 11467 sets minimum age at 21 years
- RA 11467 limits flavors to plain tobacco and menthol
- Industry lobbying to revert to 18, despite claim that products are "not intended for non-smokers or minors"
- Industry lobbying to allow many flavors

### **Balanga's Tobacco-Free Generation**

Video from https://youtu.be/jySrYCHR0hA

## **Regulatory Authority**

 RA 11467 mandates Food and Drug Administration (FDA) as lead regulator

- Industry lobby to change lead regulator to Department of Trade and Industry (DTI)
- Industry lobby accusing FDA of being too restrictive and "anti-tobacco industry"
